Asset Management Suite

Professional management of investments

- > Wealth/Asset management
- > Private banking
- > Brokerage
- > Treasury
- > Risk management

The Asset Management Suite (AMS) financial software automates complex processes used in asset management, front office to back office in a single system. It contains tools commonly used by asset managers and other finance professionals. It supports risk analysis, trading on financial markets, reporting, and legislative compliance. AMS customers can take advantage of its modular architecture and customise the set of features to fit their business and individual needs.
